

General Motors Flint Assembly

“By earning this designation, we have proved that our older facilities are just as apt to be clean as the newer ones. It is our mission at Flint Assembly, as a responsible member of the community, to do our part to create a healthier environment.”

Amy D. Farmer – Complex Director

Vital Statistics

***Clean Corporate Citizen
since December 14, 2011***

Operation

Motor vehicle manufacturer

Address

***G-3100 Van Slyke Road
Flint, MI 48551***

Genesee County

The General Motors Flint Assembly Plant (FA) began operations in 1947. FA has been recognized for manufacturing the Chevrolet Silverado and GMC Sierra while recycling over 75% of the waste streams generated. The facility is home to more than 2,940 employees who help contribute to the plant's environmental goals and objectives.

FA has used their ISO-14001 certified Environmental Management System and Michigan Business Pollution Prevention Partnership to establish and implement the following goals;

- Reduced energy and water costs by over \$2.9 million, saving more than \$20 per truck in 2011
- Recycled 1,080 tons of cardboard, plastic, paper and wood waste, which would have cost the facility \$54,000 to landfill
- Reduced oil use by more than 6,340 gallons for a savings of \$20,921
- Recycled other wastes, such as solvent rags, instead of sending them to the landfill
- Recognized by the EPA in the Energy Star Challenge for reducing energy by 30%

In addition, FA is also an active member within their local community. They are represented on the board for the Flint River Watershed Coalition and participate in many of their functions such as the Flint River cleanup. Employees also visit local elementary schools to teach them about Earth Day and recycling. They also participate in Flint River GREEN where they mentor local middle and high school students while sampling the Flint River. Employees also volunteer semi-annually at the Genesee County Household Hazardous Waste Collection Days.
